## 4) Scope of Work

The Scope of Work involves keeping the lawns mowed and trimmed at each site; weeding and maintaining the flower beds and trees at the courthouse, LEC, and the berm by the Annex; and maintaining the irrigation systems at all locations.

Lawns are to be mowed to a height of 3 inches. At the beginning of the season, lawns should be mowed weekly through approximately mid-August, then transitioning to every other week as growth slows and it becomes drier.

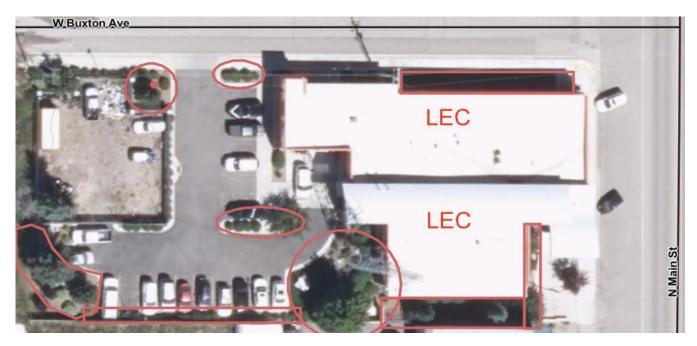

Details pertinent to each site are outlined below, along with a diagram of the sites.

## A. Courthouse

This RFP applies only to the lawn sections, trees, and flowerbeds within the red outlined area in the above picture of the courthouse grounds. This includes the lawn, trees, and shrubs on the south side of the building, the entire landscaped areas between the courthouse and inner half-circle sidewalk, and the larger lawn sections located due east and west of the courthouse between the two half-circle sidewalks. The two northern-most sections of lawn, trees in those sections, and the narrow sections of lawn adjacent to Courthouse Dr. are maintained by others.

#### B. Law Enforcement Center (LEC)

Most of the grounds maintenance at the LEC involves weeding and maintaining the trees and plants around the building. Small sections of lawn are found on the north side of the building adjacent to Buxton Ave, near the southwest corner of the building by the rear parking lot, and on the south side of the building. The plant and flower beds should be checked for weeds when the lawns are mowed and weeded regularly.

#### C. Annex

The only grounds maintenance needs at the Annex are the mowing of the two sections of lawn indicated above.

## D. Berm by the Annex

Minimal maintenance is requested for the berm located on the west and north sides of the privacy fence at the Road & Bridge yard of the Annex. At the end of the 2024 summer, there were 24 spruce and 8 aspen trees on the berm, in addition to being covered with natural grasses.

The Scope of Work needed for maintenance of the berm includes:

- 1. Trim and rake the grass once in the fall to prepare for winter. Haul away debris.
- 2. Removal of any dead trees that did not make it through the winter.
- 3. Application of pine weevil spray to spruce trees.
- 4. Application of  $2^{nd}$  pine weevil and spruce gall aphid with surfactant to spruce trees.

## E. <u>4H Building</u>

The lawn area within the red rectangle of the above picture that surrounds the 4H Building is mowed and maintained by the County; however, there is not a fence between the 4H Building property and the parcel to the north that is owned by Teton County School District #401. The north property line (south property line of the School District parcel) is a westward extension of the east-west trending chain-link fence located on the southeastern part of the School District's property.

The fenced off garden and greenhouse in the yard behind the 4H Building are maintained by various 4H groups and are not covered by this RFP. Sometimes adjustments to sprinkler heads are needed to ensure water from the automatic sprinklers is not hitting the garden and interfering with 4H activities.

## **Scope of Work**

The following items need to be performed on a regular, and as needed basis to ensure the grounds at all of our County facilities remain healthy and beautiful. Please submit separate Bidder Response Forms for each property listed in this RFP. Not all tasks are needed at each property.
