RE: RP002640000120

To All Concerned.

Location Another test hole was dug on RP002640000120 address 2243 Daydream Dr, Tetonia, Idaho. This test hole was located on the south side of the structure just east of the installed septic system. Remnant of the test hole dig is visible on the property.

Soil Narrative Please note the following:

0-18 inches of silty loam with minor rock content (Top Soil)

18-114 inches gravely sandy loam. Medium sand. Minor fines. 25% well rounded pebbles up to 3-inch diameter. B1 Soil type.

No bedrock was encountered. There was no evidence of groundwater to depth. No accumulation of water. No mottling of the soil.

***Photos attached. Description above is the narrative for the photos.**

There is no surface water flow on or adjacent to the property. No ponding surface water exists on the property or within 200 feet.

Slope in minor to none across the property.

The existing septic system installed under permit 4123085 was inspected and approved for use. This documentation was sent previously. It meets if not exceeds all State of Idaho regulations under IDAPA 58.01.03 Individual Subsurface Sewage Disposal Rules. ***This system is approved for use. EIPH retains jurisdiction over sub-surface wastewater disposal under the DEQ of Idaho and under State Rules and Regulations IDAPA 58.03.01.***

If there are any further questions concerning the ***location, depth, and installation*** of this system. Please submit a Public Record Request. You may contact me.
