

## AGENDA ACTION ITEM

---

DATE: March 11, 2024

TO: Board of County Commissioners

FROM: Greg Adams, IT Director/ Emergency Management Coordinator

ITEM TITLE: **ACTION ITEM:** Document Management Cloud Project Contract

We are ready to move forward with our cloud based document management project. This will migrate our on premise system to the cloud and also incorporate some aspects of what the old GIS server was doing and the old terminal server. This will continue to allow excellent keyword searching for County records and will clear up several loose ends in our server migration path moving forward. This will also fix the error we currently get when many people are accessing our documents at once and some people are denied access due to a lack of licenses.

**SUGGESTED MOTION:**

Approve the MCCI contract for cloud document management services for a first year cost of up to \$28,569.81
